- How to get additional answers

How to access

Types of Reports

Features of List View

The screenshot displays the GSA EA Analytics & Reporting (GEAR) application interface. The browser address bar shows the URL <https://ea.gsa.gov/#/applications>. The application header includes navigation links: Home, Assistive Technology, About, **Glossary** (highlighted with a red circle), and Contact EA Team. The left sidebar contains a menu with categories: Strategy, Business, Business Applications, GSA Parent Systems, GSA Business Applications (highlighted with a red box), Application TIME Report, GSA Retired Applications, GSA Application Graveyard, Security, Technologies, and Quick Video Tutorials. The main content area features a table of applications with columns: Application Name, Description, SSO, Two Letter Org (Short), Parent System, and Status. A blue button labeled "Click to see features of this report" is positioned above the table. The table lists three applications: 360 Survey Application, 72AQRS - 72A Quarterly Reporting System, and 8(a) STARS II Pricing Tool.

| Application Name | Description | SSO | Two Letter Org (Short) | Parent System | Status |
|---|--|----------|---------------------------|---------------------|------------|
| 360 Survey Application | This application allows GSA employees to receive anonymous feedback from managers, peers, and direct reports to establish a quantitative baseline that will allow employees to assess progress toward career goals. | OHRM (C) | HR Strat, Man & Perf (CS) | N/A | Production |
| 72AQRS - 72A Quarterly Reporting System | Provides the primary mechanism for contractors to report MAS contract sales to GSA on a quarterly basis, to be compliant with GSA mandates for IFF reporting. Canned reports used by the Vendor Support Center to track compliance. User interface for VSC is exclusively used by vendors to report sales for reporting quarterly IFF. There are plans to migrate this application as part of the TDR - transactional data repository pilot to follow GSAR (GSA Systems Acquisition Regulation) to modernize the application, which has remained unchanged over last 14 years. 72AQRS should be tolerated until migration plans are complete, then this application can be migrated; once migration is complete, this application should be eliminated. If the anticipated policy rule is not approved, this application's strategic direction will change, and will need to be tolerated to support MAS contract sales. | FAS (Q) | Policy & Compliance (QV) | GSA Advantage Suite | Production |
| 8(a) STARS II Pricing Tool | The 8(a) STARS II Pricing Tool allows users to view fully burdened labor hour ceiling rates for 8(a) STARS II industry partners. This self-service website allows acquisition personnel to quickly perform market research to make better business decisions. The loaded hourly labor rates in the 8(a) STARS II Pricing Tool include wages, overhead, general and administrative expenses, and profit for work performed in the continental United States. They apply only to time and materials and labor-hour orders, and include the 0.75 percent contract access fee. Users have the ability to: Filter search results by constellation, functional area, industry partner, labor category, work site, contract year, and geographic locality (government v. contractor site); users can also select price statistics; and | FAS (Q) | IT Category (QT) | N/A | Production |

Features of Detail View

The screenshot displays the GSA EA Analytics & Reporting (GEAR) web application. The browser address bar shows the URL <https://ea.gsa.gov/#/applications/5576>. The left sidebar contains navigation links for Strategy, Business, Business Applications, GSA Parent Systems, GSA Business Applications, Application TIME Report, GSA Retired Applications, GSA Application Graveyard, Security, Technologies, and Quick Video Tutorials. The main content area is titled "72AQRS - 72A Quarterly Reporting System" and includes a button "Click to see how to use this report". Below the title, there are tabs for Overview, Business, Technology, and Interfaces. The "Technical Overview" section displays a table of attributes and values:

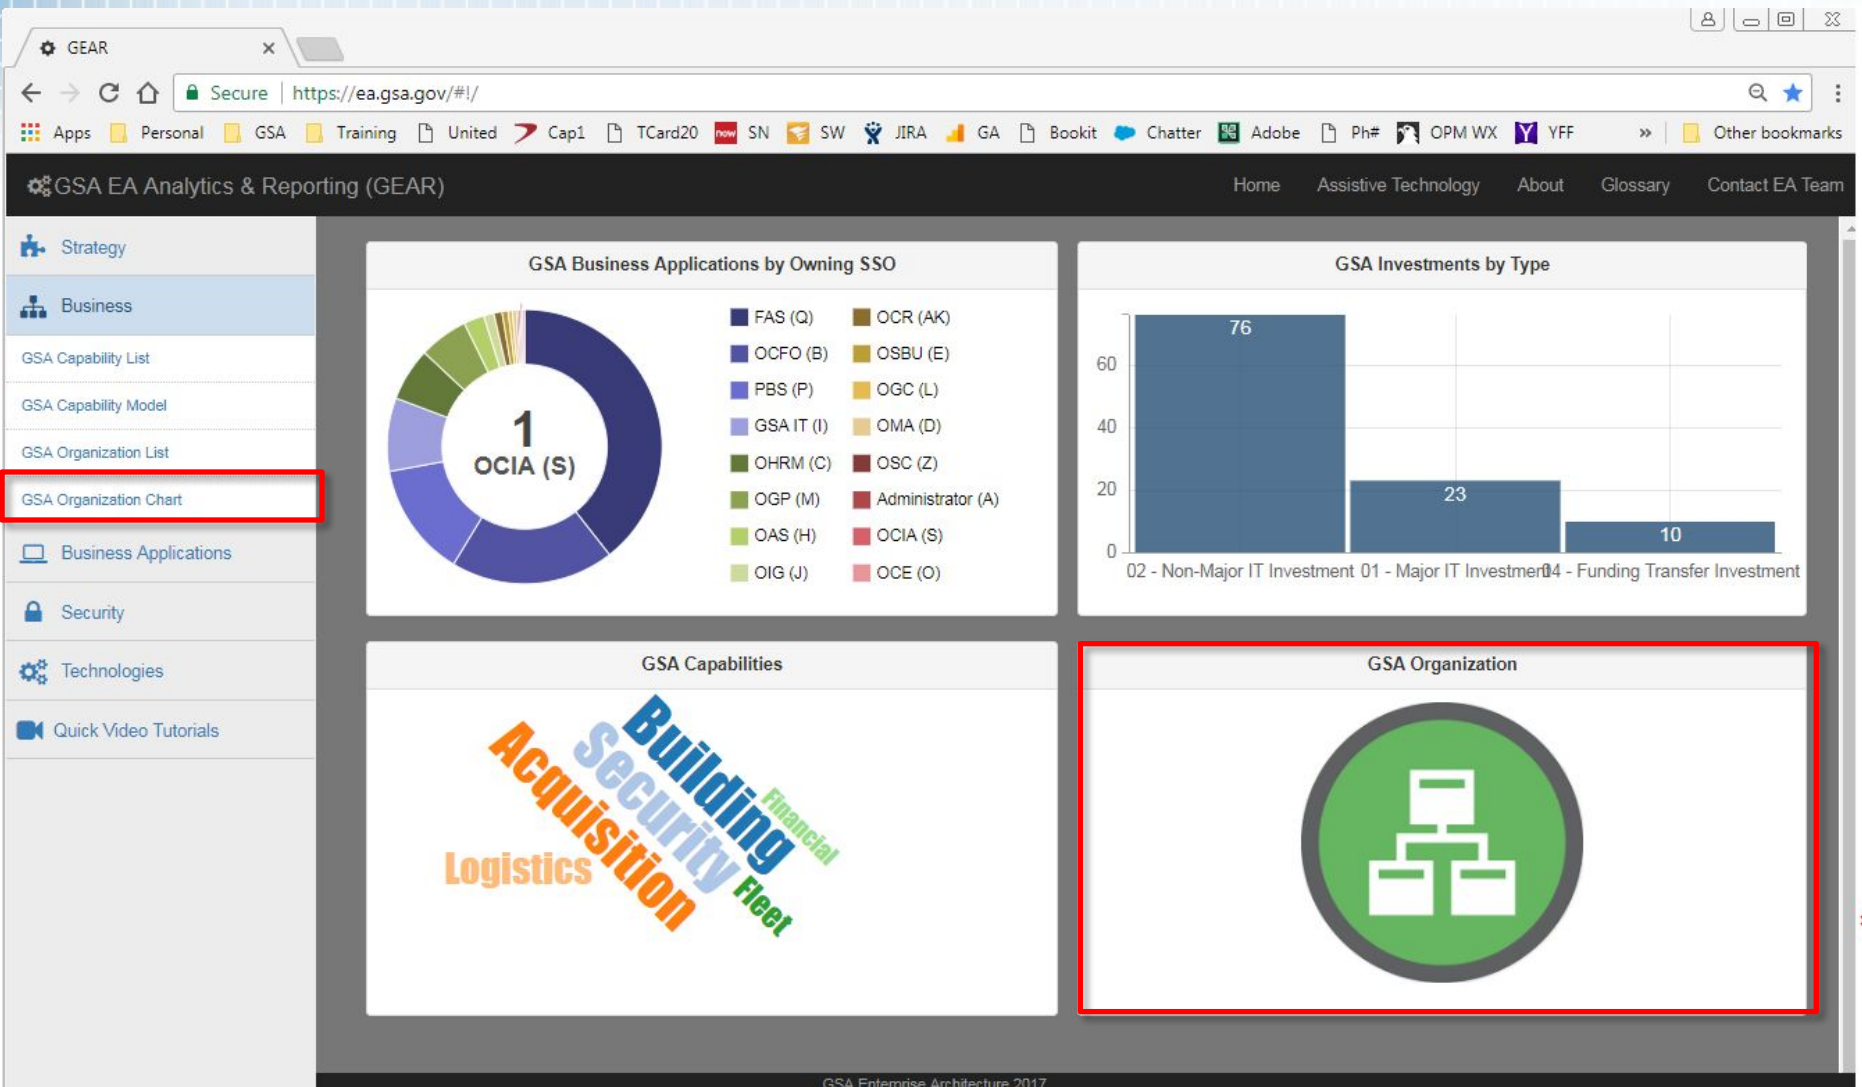

| Attribute | Value |
|---------------------|--------------------------------|
| Technical POC | Keith Machen Stuart Dvorkin |
| Hosting Provider | GSA |
| Cloud | No |
| Technology Platform | ColdFusion |
| FISMA System | GSA Advantage |

Below the technical overview, there is a "Related Technology" section with a search bar and filters. The search bar is highlighted with a red box. The table below shows related technologies:

| Technology | Description | Status |
|---------------------------------|--|----------------------------|
| Dell Toad for SAP Solutions 3.1 | Use intuitive workflows and powerful automation to simplify SAP database development and administration. Diagnose and resolve database performance issues quickly and easily. Increase productivity while maximizing SAP database performance and availability. Predict the impact of change. Implement a fully automated approach to maximizing SQL performance. Gain support for SAP HANA - with deep functional | Approved - Preferred |

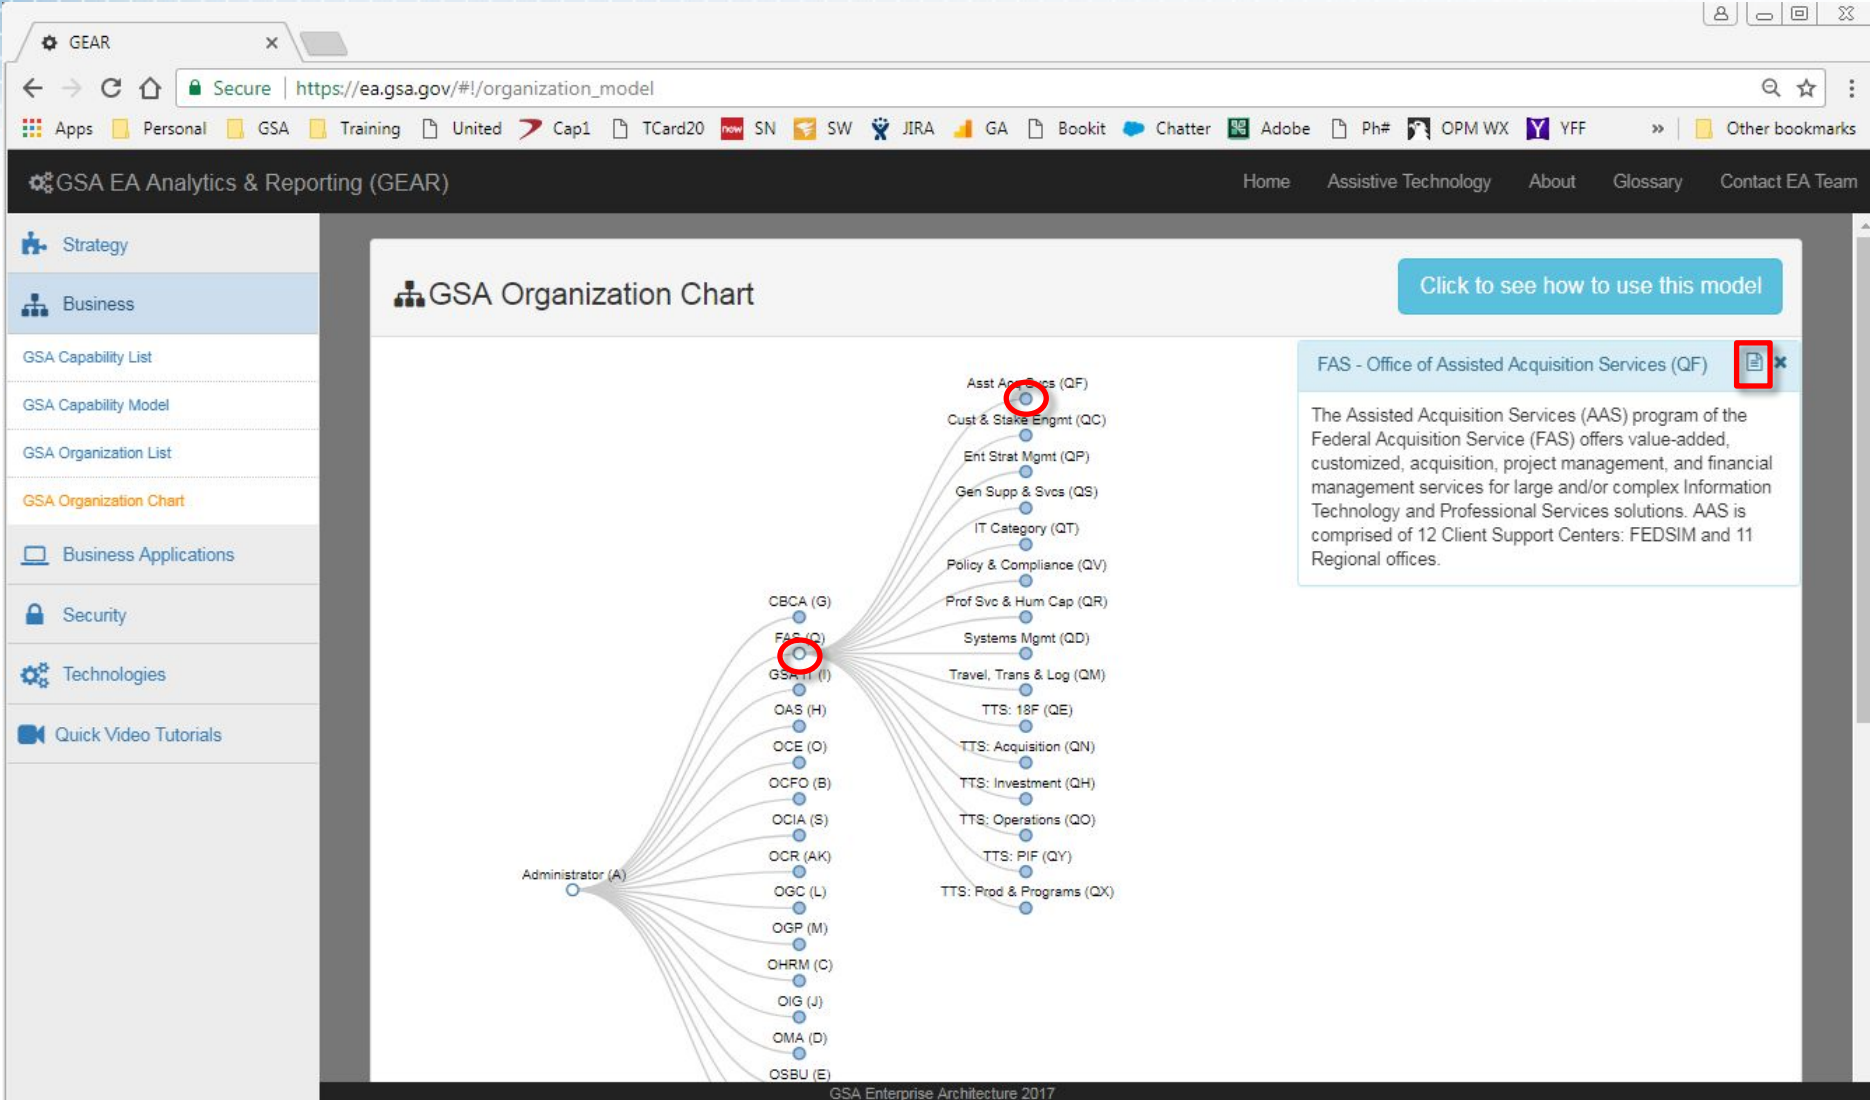

The footer of the page indicates "GSA Enterprise Architecture 2017".

adobe acrobat

| Standard Name | Description | Category | Status | Comments |
|---------------------------------------|---|--------------|----------------------|---------------------|
| Adobe Acrobat 4 | Adobe Acrobat X Standard software allows users to scan and convert paper documents into searchable, electronic PDF files, and turn paper forms into fillable PDF forms. It combines and organizes multiple file types into a single PDF document that can be shared with anyone, anywhere. Allows the application of basic security features to protect your work. | PDF Software | Denied | Obsolete |
| Adobe Acrobat 5 | Adobe Acrobat X Standard software allows users to scan and convert paper documents into searchable, electronic PDF files, and turn paper forms into fillable PDF forms. It combines and organizes multiple file types into a single PDF document that can be shared with anyone, anywhere. Allows the application of basic security features to protect your work. | PDF Software | Denied | Obsolete |
| Adobe Acrobat 6 | Adobe Acrobat X Standard software allows users to scan and convert paper documents into searchable, electronic PDF files, and turn paper forms into fillable PDF forms. It combines and organizes multiple file types into a single PDF document that can be shared with anyone, anywhere. Allows the application of basic security features to protect your work. | PDF Software | Denied | Generally Available |
| Adobe Acrobat Pro DC | Adobe Acrobat Reader DC software is the free, trusted standard for viewing, printing, signing, and annotating PDFs. It's the only PDF viewer that can open and interact with all types of PDF content – including forms and multimedia. And now, it's connected to Adobe Document Cloud – so you can work with PDFs on computers and mobile devices. With Acrobat Reader DC, you can also unlock premium features to do more with PDFs when you purchase a subscription | PDF Software | Proposed | - |
| Adobe Acrobat Professional 10 | Document exchange software from Adobe that allows documents created on one platform to be displayed and printed exactly the same on another no matter which fonts are installed in the computer. | PDF Software | Sunsetting | - |
| Adobe Acrobat Professional 11 | Adobe Acrobat is a family of application software developed by Adobe Systems to view, create, manipulate, print and manage files in Portable Document Format (PDF). | PDF Software | Approved - Preferred | - |
| Adobe Acrobat Professional 11 for Mac | Adobe Acrobat is a family of application software developed by Adobe Systems to view, create, manipulate, print and manage files in Portable Document Format (PDF). | PDF Software | Proposed | - |

GSA★**IT**

FISMA System

The screenshot displays the GSA EA Analytics & Reporting (GEAR) web application. The browser address bar shows the URL <https://ea.gsa.gov/#/FISMA/2788>. The application header includes navigation links: Home, Assistive Technology, About, Glossary, and Contact EA Team. A left sidebar contains a menu with items: Strategy, Business, Business Applications, Security (highlighted), FISMA Systems Inventory, FISMA Systems - POC, RISSO - POC, Inactive FISMA Systems, Expires FY17, Expires FY18, Technologies, and Quick Video Tutorials. The main content area is titled "Enterprise Application Services (EAS)" and features a button "Click to see how to use this report". Below the title, there are tabs for "Overview" and "Certified Business Applications" (which is selected). The "Certified Business Applications" section contains a table with the following data:

| Application Name | Description | Two Letter Org (Short) |
|--|--|------------------------|
| Bookit | Bookit! is used to quickly and easily reserve real estate resources, such as workspaces and conference rooms, from your computer. | Corporate IT (IC) |
| Contact Manager | Contact Manager is an Enterprise Application allowing users to add/modify Salesforce Accounts and linked Contacts. This application is currently used in context with the IDPI5 sf-182 module to add training vendors and contacts. | Corporate IT (IC) |
| Cyber Security Dashboard | The Cyber Security Team currently tracks 15 Cyber Security initiatives that are run by GSA. This application allows them to enter the status updates, and report on them in a concise manner to the GSA administrator. This solution will enable them to view a Cyber Security Dashboard that can be presented to the GSA Administrator. It will also allow for automated reminders to complete the Project Status updates and an easy interface for the Managers to make those updates. | Info Integ Access (ME) |
| EBC - Executive Business Case Tracker | A tracking tool to track and manage Concept and EBC requests throughout the governance process. Provides an easy to view and understand way to see the investment's progress/status throughout the process and capture the governance prioritization and CFO funding approval data. | Deputy CIO (ID) |
| EDMS - Enterprise Document Management System | The Enterprise Document Management System (EDMS) provides a set of standard tools that address the agency's document management (DM), records management (RM), workflow development, and digital signature (DS) requirements. Leveraging the EDMS, users can store, route, sign, share, tag for records management, search, and retrieve their documents securely, efficiently, and with increased mobility. | Deputy CIO (ID) |

At the bottom of the page, a footer indicates "GSA Enterprise Architecture 2017".

Assisted Services Shared Information SysTem (ASSIST)

Click to see how to use this report

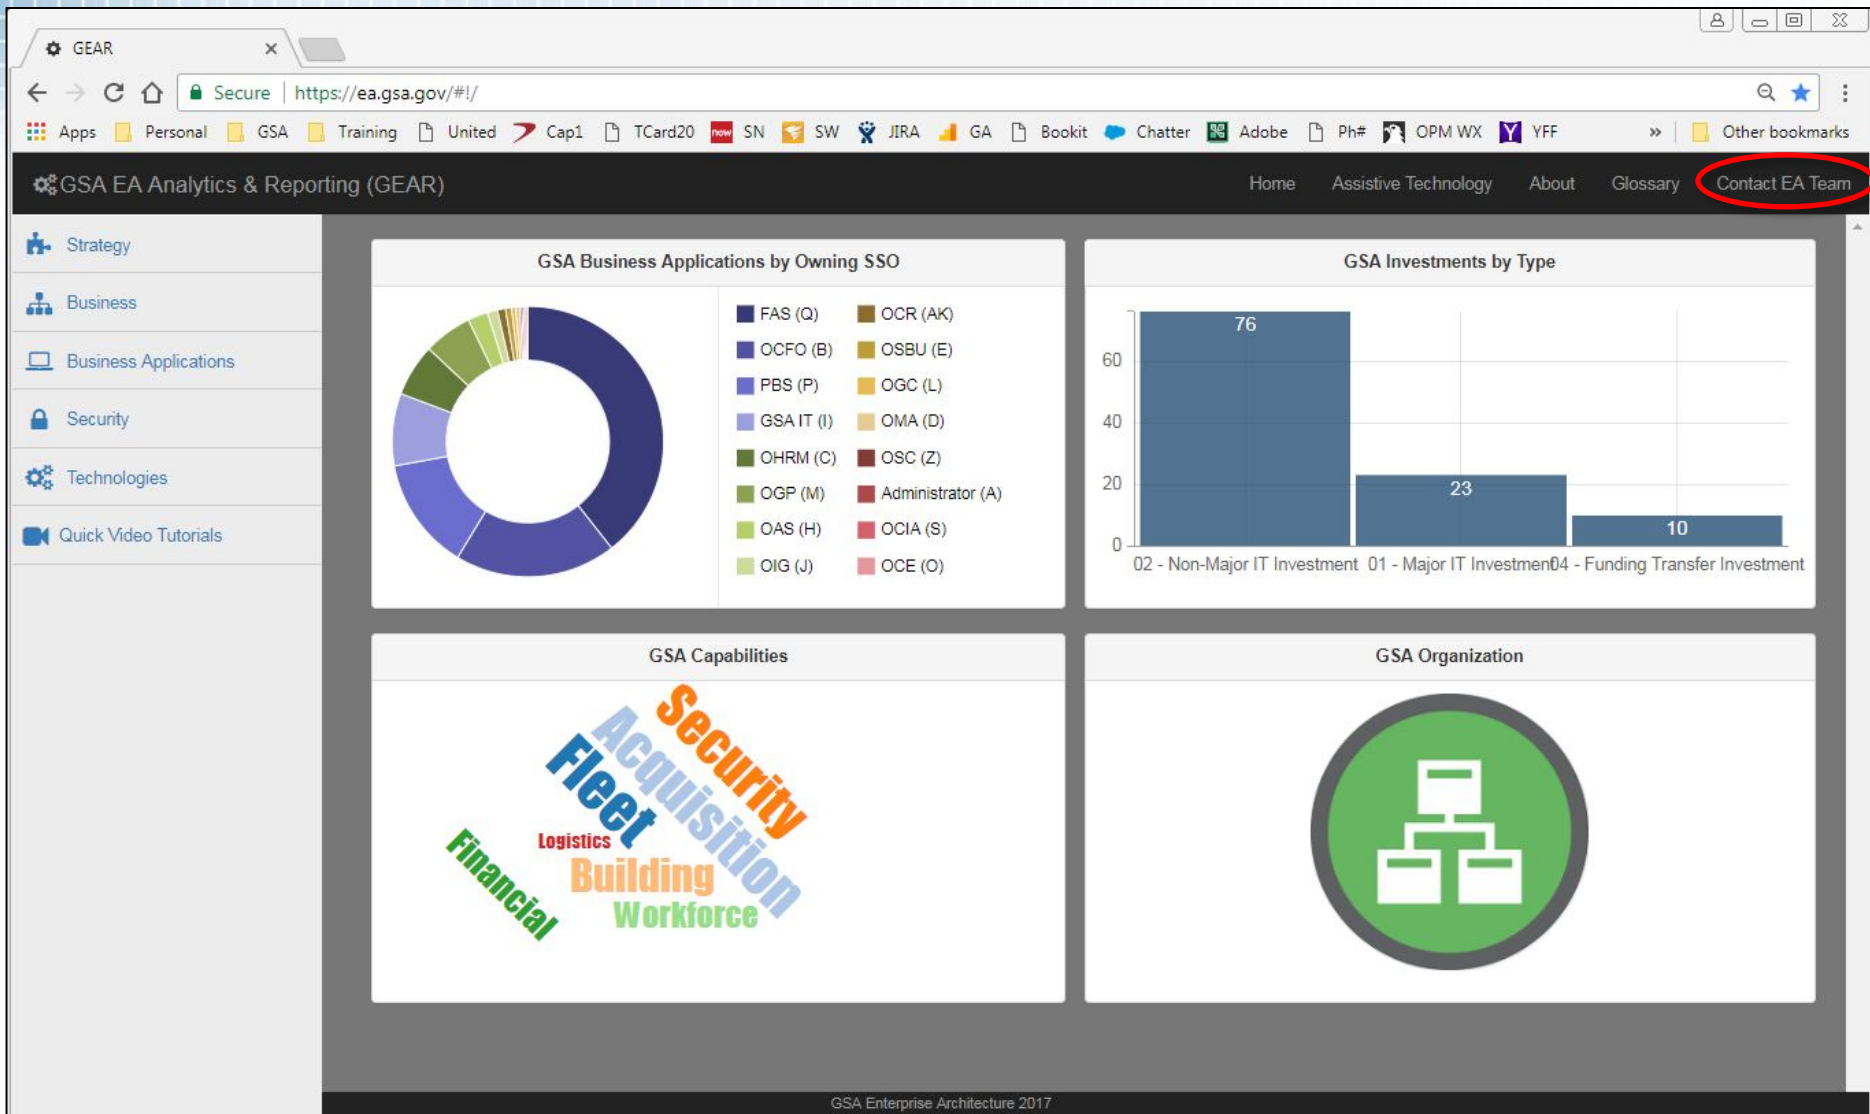

Overview **Related Business Applications**

Search

| Business Application Name | Description | SSO | Two Letter Org (Short) | Status |
|---|---|---------|------------------------|------------|
| ASSIST - Assisted Services Shared Information SysTem Portal | ASSIST is a series of 'shared services' (common business and system functions) that represent the single, integrated, solution for all GSA assisted acquisitions. ASSIST reduces 'stovepipe' legacy functionality. It promulgates end-to-end electronic procurement with integrated end-to-end financial management supporting customer engagement. This 5 year effort consists of phased modular deployments which include strategic consolidation of multiple financial feeder systems and tools into a singular capability. Effort includes consolidation of capabilities of the Regional and National Business Applications (RBA&NBA). It also includes leveraged web service integration to all enterprise functionality (eBuy, SAM, ECMS, APM, Pegasys.). | FAS (Q) | Asst Acq Svcs (QF) | Production |
| CPRM - Contractor Payment Reporting Module | An RBA application, the Contractor Payment Reporting Module (CPRM) is a web-based application that enables key business processes and data collections to occur. These include: Contractor submission of order data, purchase data and Contract Access Fee (CAF) payment, Agency Outside Contracting Officer (OCO) delegation request, approval and notification, GWAC Center management and reporting of all data activity. To enable ease of use, some submission of data occurs via web service-based electronic interface. An additional data input occurs when GSA Assisted Services GWAC orders initiated in the ITSS component of the RBA are awarded or modified. | FAS (Q) | Asst Acq Svcs (QF) | Production |
| ITOMS - Integrated Task Order Management System | An RBA application, ITOMS (part of ASSIST) is a custom application developed on the JBoss Enterprise Platform (FAP). ITOMS is primarily utilized by GSA | FAS (Q) | Asst Acq Svcs (QF) | Production |
